

The compact size and high performance of the **FRASTE MULTIDRILL ML** drilling rig enables a large and multi-purpose area of its application: soil testing, environmental monitoring and drilling water wells.

It works with all drilling systems: rotary drilling with direct / reverse fluid circulation or air; DTH hammer; roto-percussion system; conventional and wired wires.

A wide range of drilling tools and accessories meet all drilling needs.

#### Basic technical data:

- Engine power: 74 Kw (100 Hp) TIER 3
- Max. torque of the rotating head: 900 daNm
- Max. rotating head speed: 1220 o/min
- Drilling diameter: Ø 40-250 mm
- Weight ~ 5700 kg
